<td>Chlorine and Caustic Soda Factory</td>
<td></td>
</tr>
</tbody>
</table>

**Description of Project**
- The project promoter intends to produce chlorine together with its co-products i.e. caustic soda (sodium hydroxide NaOH) and hydrogen; mainly for use in water treatment applications and metallurgical processes at mines.
- Project location: Swakopmund, Erongo Region

**Estimated Investment Cost**
- US$ 11,304,348

**Status**
- The project is still at pre-feasibility stage.

**Services/Products**
- Chlorine and caustic soda

**Target market/s**
- Following industrial sectors in Namibia:
  1. Mining - The local uranium industry requires caustic soda (sodium hydroxide) for its uranium leaching plants.
  2. Water Treatment - Chlorine compounds such as Sodium Hypochlorite and Chlorine Dioxide are used as disinfectants of water; especially for the removal of harmful organisms. Potential clients include municipalities, the national water utility (Namwater) and companies that provide customized water treatment solutions i.e. Aqua Services and Heat Exchange.
